Abstract (en)

[origin: DE102006055349B3] The basket (1) has a set of wheels (15, 16), which are attached with basket guide rails of a dishwasher in such a manner that the wheel (15) running on an upper side of the basket guide rail is a supporting roller and the wheel (16) limits a rotating movement of the basket arising during extracting the basket in a gravitational force direction. A guide roller and a safety element (17) are combined to a support mechanism (46).The wheels and the safety element are provided on two opposite sides of the basket.
