Abstract (en)
[origin: WO2008090572A1] The safety lock with one or more retainer plates moreover comprises a variable size recoding element (11) having a succession of sizes (KO, KI, K2), each which enables a corresponding key (2a, 2b, 2c) of the type with one or more bits and which disables every key (2a, 2b) enabled by every preceding size in the succession, each key having its own control means of the recoding element adapted to automatically restore it in the size which enables the key when the recoding element has a size preceding that which enables the key.
