Abstract (en)

[origin: EP2106889A2] The machine has an angular adjustable stop rail (5) e.g. mitre stopper, with an operating tool and a sectional line (S) defined by an operating tool. The stop rail is arranged on a work table, where the stop rail exhibits two rotation axles (I, II), which are movably guided into rotation axle guidance on the work table. The stop rail is provided in a longitudinal movable manner regarding both rotation axles. The stop rail is swivelably arranged on both rotating bolts (3, 4). The operating tool is moved along the sectional line.
