Abstract (en)

[origin: EP2107009A1] The palette (30) has multiple layers (20x-20x+n) with packages (10) i.e. three dimensional body, where each package has an upper side (11), a lower side and a lateral area (14). The packages have adhesive medium (50) applied on the upper side and/or the lateral area. The adhesive medium detachably co-operates with the lateral area of the packages within the layer (20x) and with the lower side of the packages of the layer (20x+1) on the palette. The upper side, the lower side and the lateral area of the package are provided with same planar surface. An independent claim is also included for a method for palletizing packages.
