Abstract (en)
[origin: EP2107012A1] A device (14.1, 14.2) for applying a liquid product (16) by atomizing or spraying from a storage container (17.1, 17.2) by means of pressurized gas (18), wherein the application is carried out by an atomizing or spraying head (1) and the storage container (17.1, 17.2) is already filled with the product (16) or designed to be manually filled with an optional product (16). The pressurized gas (18) is stored in a separate pressurized gas container (7), wherein the pressurized gas container (7) is designed to be manually connectable to the storage container (17.1, 17.2) in such a way that after the pressurized gas container of (7) is connected to the storage container (17.1, 17.2), the product (16) is supplied with pressure by means of the pressurized gas (18) through an activated valve attachment (24.1, 24.2) (Fig. 1).
