Abstract (en)
[origin: EP2107015A1] The invention is related to a refuse collection system, comprising a refuse collection container (1), a lifting device (19) and a ground surface (23), said refuse collection container (1) comprising a supporting base (2) supported on the ground surface (23), a top (3), a circumferential wall (4) extending between the base (2) and the top (3), which base (2), top (5) and circumferential wall (4) define a refuse collection chamber (8), and a closeable opening for depositing refuse in the chamber (8), said refuse collection container (1) and lifting device (19) comprising coupling means (10,11,21,22) which are activatable for coupling the refuse collection container (1) and the lifting device (19) to each other for emptying the refuse collection container (1). The coupling means are of a bayonet type (11,21).
