Abstract (en)

[origin: EP2107037A1] The disclosure relates to a dispensing system (1) for dispensing fuel to a vehicle. The dispensing system (1) comprises a hose storage space (2) with an at least partly open front portion, a hose connection (4), and a hose (5) connected to the hose connection (4) and being provided with a dispensing mouth (6). The dispensing system (1) further comprises a first hose guide member (8), and a second hose guide member (9). The hose (5) is in a retracted state adapted to extend from the hose connection (4) to the first hose guide member (8), in front of and below the first hose guide member (8), backwardly towards the second hose guide member (9) and above and behind the second hose guide member (9). The second hose guide member (9) is moveable back and forth in the hose storage space (2); forwardly towards the front portion for allowing extraction of the hose (5) and backwardly from the front portion of the hose storage space (2) for retraction of the hose (5) into the hose storage space (2).
