Abstract (en)

[origin: EP2107183A2] The device (1) has two profiled rails (11) spaced apart from each other and arranged at horizontal front side (8) and/or vertical front side (9) of a glass plate (2) that is made of a laminated safety glass. The glass plate is connected with the profiled rails by a hardening liquid adhesive (10) in a force-fit manner. The profiled rails are fastened to a base of a building directly or by a connecting link (12). The profiled rail is made of a metallic material and comprises a bar that is arranged transverse to upper surface of the glass plate.
