Abstract (en)
[origin: EP2107189A1] The fitting (B) has a stopper body (30) fixed at a window or a door, and a grip (10) supported in an axial fixed rotatable manner at or in the stopper body. A spring loaded bolting unit (20) is supported in a longitudinal movable manner parallel to an axial direction (A) for locking the rotation movement of the grip against the stopper body. The bolting unit exhibits a locking unit (21), which is brought in contact with a bolting cover (40) arranged on the stopper body in a torque proof manner during achieving of the functional position of the grip relative to the stopper body.
