Abstract (en)
[origin: EP2107298A1] The lamp has a fixation area provided for fixing of a hanging element i.e. wire rope (2). The fixation area has a guidance slot aligned transverse to a longitudinal extension of the lamp, where an end area of the hanging element facing the lamp is guided into the guidance slot. The guidance slot is partially covered by a plate shaped element i.e. segment plate (5), with a slot designed radial to a rotary point, where the slot is movable over the guidance slot. The slot receives an end area of the hanging element and is movable into the guidance slot during rotation of the plate shaped element.
