Abstract (en)
[origin: DE202005014376U1] Housing for refrigerator or freezer has a body (1), a door (2) and a hinge joint neighbouring a side surface (4) of the body (1) for connecting the door and body. The door has a first recess facing the refrigerator body and the hinge joint comprises an arm (10) that is fixed to the body (1) and protrudes into the recess (26). The arm establishes an axis of the hinge joint and forms a clearance (27) facing the side surface (4) into which the side wall of the recess (26) protrudes when the door is opened.
