Abstract (en)

[origin: EP2107539A2] The wirelessly controllable distribution bar (1) has a number of functional units, particularly multiple power outlet bars with multiple power outlets (1a,1b,1c). An integrated transmission and receiving device (3) is provided for a bidirectional radio operation of the individual functional units. A signal transducer (4) is a bidirectional remote control with a status display (18) for displaying the operating condition of each functional unit which is provided with an address for individual control and status request.
