Abstract (en)

[origin: WO2008038308A1] A container (1) consisting of at least two flexible films, said container having at least one outer surface (3) and at least one inner surface, characterised in that at least one portion of said outer surface (3) is suitable for forming a handle (2) of the container (1) itself and capable of resisting lacerations during its use. Said container is produced by means of a method that is efficient, cost-effective and capable of being carried out with a limited number of steps, since no further step is necessary at the end of the production of the container (1) to apply the handle (2) to the container (1) itself.
