Abstract (en)

[origin: EP2108296A2] The door has a door segment (3), at least one upper roller for association with an upper running strip (5) and rotatably mounted on a holding unit (9), at least one lower roller for association with a lower running strip (7) and rotatably mounted on a holding unit (11), whereby the holding units can be joined to the door segment. The upper and lower rollers are height adjustable to provide substantially play-free lateral mobility of the door segment. An independent claim is also included for a shower partition with a sliding door.
