Abstract (en)  
[origin: EP2108777A2] The casing (1) has a casing part connected above a joinery (3) e.g. window, and another casing part designed for being extended in a reentrant (18) provided in a masonry above an opening (4). The former casing part has a covering unit formed of a covering profile and a covering layer, and adapted to be applied on an upper peripheral border (24) and a vertical peripheral border of the reentrant from an internal side (7) to the masonry. The covering profile is articulatedly mounted in an upper edge of an internal wall (20) using a junction band made of flexible plastic material.
