Abstract (en)

[origin: EP2108798A2] The present invention relates to an internal combustion engine, in particular for go-karts, motorcycles, motorboats, airplanes, motor vehicles and the like, comprising an engine body defining a combustion chamber therein. The main feature of the invention is that first and second opposite pistons, coupled to respective driving means are included in said combustion chamber, the first and second pistons being movable with respect to a middle portion of the combustion chamber where igniting spark plug means are arranged. The engine further comprises fuel feeding and gas discharging means.
