Abstract (en)

[origin: EP2108907A1] The device has a housing with an internal space for receiving products to be refrigerated. A door is provided with a height-adjustable door bin and a fixed door bin for opening and closing the internal space and comprises an inner wall and an outer wall. The door comprises a fastening rail (8) for holding the door bins at the inner wall. The fastening rail is formed in a longitudinal direction in a split manner, and is made of plastic. The rail comprise an upper fastening rail part (11), a middle fastening rail part (12) and a lower fastening rail part (13).
