Abstract (en)

[origin: EP2109089A2] The label (1) has an inner label (10) and an outer label with beginning areas (3) and end areas (4), respectively. The areas are provided over breadth (B1) of a rear side (7) of the inner label partially using adhesive (5) i.e. hot glue. The end area of the outer label is extended around a strap (11), whose rear side (12) is partially provided with the adhesive. The adhesive applied on the strap is spaced from the adhesive applied at the end area of the inner label. The strap overlaps with the beginning area of the outer label in an applied condition of the label. Independent claims are also included for the following: (1) a device for application of a rotatable label on a container (2) a method for application of a rotatable label on a container.
