Abstract (en)  
[origin: WO2008096949A1] The present embodiment proposes a nozzle for a cleaner. The nozzle for the cleaner includes a body in which at least one steam-discharge hole for discharging steam is formed; a cleaning element connecting part to which a cleaning element for receiving the steam is connected; and a steam guide part which allows the steam to move into the cleaning element as at least some of it is disposed between the cleaning element connecting part and the cleaning element.
