Abstract (en)
[origin: EP2110052A1] The shell (11) has a middle section (19) supporting a back in a longitudinal direction and includes a set of ribs (15) that laterally protrude in the transverse direction from the middle section. The ribs are separated from each other by lateral notches (17) and are bent forward, and movable against each other. Openings (21) are formed in the middle section, where opening run in transverse direction and stop between ends of lateral notches adjoining in longitudinal direction. Ends of notches and the ends of the openings lie in two regions.
