Abstract (en)

[origin: EP2110353A2] The device (1) has an unwinder (2a) to wind around the label strips of a label strip role arranged opposite to each other in relation to a part of the unwinder in a rotating manner. The unwinder has a bearing surface (4a,4b), where the label strip role is taken, and has a guidance device (10) provided at the bearing, which is conductible by an opening arranged in the label strip role. The guidance device is detachable from the bearing surface.
