Abstract (en)
[origin: EP2110483A1] The module has a frame fixedly mounted on a wall, and a foam body attached to the frame. A set of functional units (14-18) e.g. toilet paper dispenser, including a set of functional elements e.g. folding grip (12), is accommodated in a set of cavities of the foam body. A panel is inserted on a view side of the foam body and/or the functional units, where the panel exhibits a recess for the functional elements. The panel comprises a set of panel elements (78-84) held at the foam body by a magnet connection. A set of adjustment units adjusts the functional units relative to each other. An independent claim is also included for a method for installation of a front wall-like wall module.
