Abstract (en)
[origin: EP2110486A2] The anchor has a suspending section (6a) for suspending shackle, hook or ropes, and an anchoring section molded into a concrete floor (3). The suspending section is arranged in a recess unit (2) that is provided adjacent to a lower casing (4) for molding into the concrete floor and generates a hollow space (1) adjacent to a lower side of a cover, where the hollow space is enclosed in the floor after removing the suspending section. The recess unit is made of foamed plastic and has a length of 15 to 20 centimeter. The recess unit comprises a wall made of metal or plastic.
