Abstract (en)

Sealing member (2), particularly for use in connection with constructional members (1) penetrating membranes, wherein the sealing member (2) is in one piece and has a general U-shape when seen in a first plane view, such that two legs (5,6) are integral with a bridge (7) forming the U, where the width of the legs (5,6) and the bridge (7) in the first plane is substantially larger than the thickness of the sealing member (2) in a second plane perpendicular to the first plane, where the bridge (7) and legs (5,6) have an outside and an inside edge, and along said inside edge a resilient sealing section (8) is arranged.
