Abstract (en)
Blind overlapping element comprising a first sliding-block portion (1A) which is to be mounted along a guide track (2), and a second portion to which a blind sheet is to be connected that projects in cantilever fashion along its own longitudinal direction (14a, 14b) in a staggered plane (14b) from the first portion, wherein the second portion (14) is pivotally mounted on the first portion so as to be adapted to oscillate around an axis (4') that is parallel to said staggered plane (14B) and is substantially orthogonal to the longitudinal direction (14A, 14B) of the second portion.
