Abstract (en)
[origin: WO2006128447A1] The invention relates to an improved wire netting (1) with lamps (15) and to an arrangement of said netting on a building structure. A lamp support holder (8) is integrated into a netting and allows for a lamp support (12) to be removed from and reinserted into the netting without disintegrating the lamp support holder (8). Alternatively, a lamp support holder (8) is fastened to the netting or a like hanging, and the lamp support (12) is fastened to the holder, preferably by means of clips.
