Abstract (en)  
[origin: EP2110622A2] The device has a set of temperature zones (12, 14, 16, 18) and a refrigerant circuit with a compressor (20), a condenser (30) and an evaporator. The refrigerant circuit has a solenoid valve (50) for controlling of refrigerant flow. The evaporator exhibits a set of evaporator surfaces or areas, which are attached or surface-moderately adapted to the set of temperature zones. The evaporator has a set of coils within area of a freezing part (11). A fan (70) is arranged in a cooling part (13) and/or in a cooling compartment (17).
