Abstract (en)

A method for demonstrating video images during mass-events such as a stadium or stage performance is proposed. The method includes assembling a large-area display in a field by positioning a plurality of stand-alone video display panels (14) adjacent one another; displaying corresponding video image sections at each display panel (14) at an appropriate time, in accordance with control signals transmitted from a main control unit (16) thereby forming a desired overall video image on the large-area display; and disassembling the large-area display and removing the panels (14) from the field, wherein during the steps of assembling, displaying and disassembling the panels (14) are being carried and supported by men (58). A video display panel (14) and a large-area display system (10) for carrying out the method are also disclosed.
