Abstract (en)

[origin: EP2110900A1] A lampholder (1) for an electrical appliance, in particular for a refrigerator, is disclosed, comprising a thermal switch (5), situated inside the lampholder (1), which cuts off the electrical supply circuit of the lamp if the temperature inside the electrical appliance exceeds a pre-set value. The thermal switch (5) is mounted, preferably removably, in a seat (6) formed in the inner wall of the lampholder cavity (2) designed to receive the lamp socket and has on its surface facing said cavity (2) a first push-on contact (7) connected to one of the electrical contacts (3, 4) on which the supply conductors of the lamp abut and a second push-on contact (8) connected to a terminal of the lamp socket by means of a side contact member (9) or directly.
