Abstract (en)
[origin: WO2008084057A1] This invention relates to compounds with a combination of cannabinoid-CB₁-antagonism and serotonin reuptake inhibition to pharmaceutical compositions containing these compounds, to methods for preparing the compounds, methods for preparing novel intermediates useful for their synthesis, and methods for preparing compositions. The invention also relates to the uses of such compounds and compositions, particularly their use in administering them to patients to achieve a therapeutic effect in psychosis, anxiety, depression, attention deficits, cognitive disorders, obesity, drug dependence, Parkinson's disease, Alzheimer's disease, pain disorders, neuropathic pain disorders and sexual disorders. In particular the invention relates to compounds of the general formula (I): wherein the symbols have the meanings given in the specification.
