Abstract (en)
[origin: WO2008071519A1] Surfactant granulates, comprising 10 to 90% by weight of amine oxide, 10 to 90% by weight of carrier material, and 0 to 50% by weight of binders, can be produced by means of fluidized bed granulation and used for upgrading detergent or cleaning agent compositions. The upgraded detergent or cleaning agent compositions are characterized, among other things, by an improved removal of fat-containing soil.
