Abstract (en)
[origin: WO2008091201A1] In accordance with the invention, a system for communication of information is provided. The system comprises a wireless communication network and one or more recipients. The recipients in turn comprises means for communicating over the wireless communication network, means for receiving satellite navigation signals, and a projector unit for displaying information received over the wireless communication network. The system further comprises a server having a server application for receiving and transmitting information over the wireless communication network and an input device connectable to the server for inputting information to be communicated to a selected recipient and displayed by the projector unit. The invention provides a means for accomplishing truly directed advertising. Further, by including a projector unit the information can be displayed on any suitable projection surface, and having any desired size.
