Abstract (en)
[origin: EP2111972A2] The stamp (10) has a shank and a head, where the head has a reflector surface, a cylinder surface and a rounded transient area between reflector surface and cylinder surface with two radiuses. The former radius is larger than the latter radius and the stamp head has a conical transient area from the cylinder surface to the shank. The diameter of the head (14) is smaller than twenty five millimeter and the former radius of the transient area is selected in such manner that its height is smaller than the half height of the cylinder surface.
