Abstract (en)

[origin: EP2112067A2] The device separates an individual clip from a clip belt (2), where a direction of the clip belt is multiply changed. The clip belt is guided into a guiding pipe (6) that is curved corresponding to a given direction. The pipe comprises a recess at inner side, and a roller (12) is engaged in the recess and surface of the roller lie in middle of the guiding pipe. The roller is rotatably supported on a roller block that is secured at the guiding pipe. The belt is made of metal, plastic, paper or cardboard.
