Abstract (en)
The invention relates to a sliding door arrangement, especially for a vehicle, with a door 5 which is adapted for being opened by a sliding movement and a pivoting movement. According to the invention, a sliding locking unit 1 is provided for locking the sliding movement of the door 5 during the pivoting movement of the door 5 and/or a pivoting locking unit 2 is provided for locking the pivoting movement of the door 5 during the sliding movement of the door 5. This is advantageous since the sliding door allows a secure opening of the door 5 during the sliding movement and the pivoting movement of the door 5.
