Abstract (en)

[origin: EP2112437A2] The vapor extraction device (1) comprises a vent (111), a filter element (2) and a vapor guide plate (3). The vapor guide plate is mounted such that it is moved relative to the filter element and the vapor guide plate locking a suction area of the vent in a stationary position. The filter element completely covers the vent. The surface of the vapor guide element corresponds to the suction area, which is assigned to the vapor guiding element.
