Abstract (en)

[origin: EP2113972A2] The present invention refers to an adaptor device for printed circuit connectors comprising, at a first end, an interface (11) configured as an RJ-45 connector from which a first portion (12a) of at least two contacts (12) face out on a first side, at a second end foreseeing a housing seat (13) inside which a third portion (12c) of said at least two contacts (12) projects. Preferably, the housing seat (13) has a box-shaped configuration open on a side face and on the upper face, the third portions (12c) of contacts (12) are housed inside the housing seat (13) and project towards the open upper face.
