Abstract (en)
[origin: WO2008077664A1] The invention relates to a stator arrangement, in particular for windshield wiper assemblies for motor vehicles, having a transmission housing and a stator (1) which is fixed thereto by bending over at least one fastening part (15a, 15b, 15c, 15d) and at least one bending edge (9) of the transmission housing. According to the invention, the fastening part (15a, 15b, 15c, 15d) is formed by bending over a part of the circumference of an edge part (4a, 4b, 4c, 4d) of the stator (1), which edge part is partially cylindrical and extends continuously along the circumference before the bending over.
