Abstract (en)

[origin: WO2008093296A2] A feeder device stand (10), in particular for a packaging line (1) incorporating it, of the kind suitable for keeping the feeder device (50) in the requested position with respect to the packaging line (1), allows a precise positioning of the device with respect to the line, adaptable according to the insert to be fed, and comprises; a pedestal (11) provided with an engaging projection (12) apt to be introduced below the body (5) of the packaging line (1); blocking means (13, 14, 20) for arranging the pedestal (11) in a fixed position with respect to the packaging line (1); a saddle (30), positioned at the top of the pedestal (11), arranged to be translated, with respect to the pedestal (11), across the packaging line (1); a pivoting table (40), mounted on said saddle (30), on which a support base (41) for the feeder device (50) is formed; and means for positioning said support base (41) with respect to said packaging line (1).
