Abstract (en)

[origin: WO2008089814A1] The invention relates to a multipack comprising at least two stacks (1, 3) of packs, in particular cigarette packs (5), lying next to each other, and comprising an outer wrapping, which reaches around the stacks (1, 3), wherein a removal opening (47) is provided or can be produced in the region of an end face of the multipack and wherein a holding device (11) is provided between two stacks on the end face that has the removal opening (47) and acts in an adjustable manner on one or the other stack, thereby preventing the packs of the latter from advancing into the region of the removal opening (47).
