Abstract (en)
[origin: WO2008104261A2] A laundry conveying device comprising a container having a closable opening; one or more carrying straps attached to the exterior of said container; and a projecting feeding rail connected to said container and adjoining said closable opening. The feeding rail has a slide part arranged for feeding laundry via said opening, and an attachment part arranged for attaching to a front-loaded machine. There is also disclosed a bag comprising a container having a closable opening. The container consists of a base and a top body extending from the base. The bag further comprises one or more carrying straps, which are attached to the exterior of the container via strap attachment means. A collapsible device and pedestal are also disclosed.
