Abstract (en)
[origin: WO2008071325A1] The invention relates to a dewatering screen for the production of paper having multi-layer water marks, having a carrier screen (54) comprising a multi-layer relief (30) in the form of the water mark to be produced in a partial region. The invention provides that the multi-layer relief is formed by an injection-molded, perforated (40) water mark insert (30).
