Abstract (en)

[origin: WO2008102395A1] A modular plate (30a-30e) with a quadrilateral shape comprises a horizontal central portion (31) and four corner portions (32) which are raised with respect to the central portion (31) and connected to the latter. The corner portions are able to be supported by four respective column-type devices (20) for supporting the modular panels (10) of a raised floor. At least one free space for the passage of air between at least two consecutive raised corner portions (32) is envisaged.
