Abstract (en)

[origin: WO2008079955A2] The invention provides methods, apparatus, systems and computer program code (software) products operable in a digital processing environment, and more particularly a digital storage environment, for enabling a mapping from a set of applications to storage elements used in the digital storage environment, and to provide a hierarchical image of a set of applications (other software programs) that are generating load on any storage element in the digital storage environment.
