Abstract (en)
The scissor unit has a guiding element (11) elastically supported in a periphery of a rotation shaver head (12). The guiding element is elastically supported in a guide of the scissor unit, so that the guiding element is slidable in a vertical direction parallel to a rotation axis of the shaver head. The guiding element is formed according to type of a circular arc segment and is partially manufactured from elastic material, where a support of the guiding element is formed independent of a support of the shaver head.

Abstract (de)
Die Erfindung betrifft eine Schereinheit für einen elektrischen Rasierer mit wenigstens einem Rotationsrasierkopf (2), wobei wenigstens ein federnd gelagertes Führungselement (1) in der Peripherie des Rotationsrasierkopfes (7) so in einer Führung (1a, 1b) angeordnet ist, dass es in vertikaler Richtung parallel zur Rotationsachse des Rotationsrasierkopfs (2, 12) verschiebbar ist.
