Abstract (en)
[origin: EP2116495A2] The carriage (1) has a chassis (2) comprising an air cushion support or wheels arising on an underground (4) i.e. track. The chassis has an upper side-arranged storage (5) for storing a tambour. A supporting frame (7) receives differently dimensioned packaged goods (8) e.g. partial web rollers, and is detachably connected with the storage. The supporting frame receives the packaged goods as a bearing device, support device and transport device. The storage and the frame are designed such that the frame together with the packaged goods is attached to the carriage.
