Abstract (en)  
[origin: EP2116503A2] A safety brake for a cable hoist has the top of each cable (6) connected to a separate winch drum (8) with integral drive (10) and with the bottom of each cable connected to the load platform (4) by safety brakes (12). These are adjustable and prevent mechanical shocks through sudden stopping of the winch drives. The friction brakes incorporate friction surfaces held together by adjustable springs, and with all or some of the friction surfaces clad with brake lining. The hoist can be fitted with ropes, cable or chains.
