Abstract (en)

[origin: EP2116682A2] The connection profile (1) has a sealing shank (2), which is mounted at a component (10) with a sealing strip (3), and has a plastering shank (5). The sealing shank has a support (4) for a flat element (7). The support is closed by the sealing belt. The sealing belt is released from the sealing shank during a relative movement increasing the gap between a plaster (12) and a component.
