Abstract (en)

[origin: EP2116687A2] A PVC window or door frame with an aesthetically improved outer surface, comprises frame polyvinylchloride extruded section members (1), including on at least an exposed to view surface portion thereof a natural wood veneering coating (2) protected by fire retardant paints designed for providing the section member with a high resistance against section member welding temperatures. A method for making a PVC window or door frame with a layer of natural wood material veneering.
