Abstract (en)
The present invention relates to a cooking hob (10) with at least one fastening element (22). The fastening element (22) is detachably or permanently attached or attachable at an outer portion of the cooking hob (10). The fastening element (22) comprises at least one spring element (24) acting outwardly into a substantially horizontal direction in order to clamp the cooking hob (10) within a cutout (18) enclosing circumferentially said cooking hob (10). At least one distance element (30) is detachably or permanently attachable at an inner side wall of the cutout (18), so that the spring element (24) bears against the distance element (30) in a mounted state of the cooking hob (20). Further, the present invention relates to an according distance element for the cooking hob (10).
